

Card Games

Addition & Multiplication Practice - Play “**Fast Facts**,” the deck of cards are dealt out to the two players in a pile face down. Each player turns over a card and the players both race to announce the sum or product and quickest responder takes the pair, OR each player draws 2 cards each round and the greatest sum or product takes all 4 cards.

Addition Practice - Play “**Go Ten**,” like Go Fish, where instead of asking for the same number to make a match, players take turns asking for the number required to reach a sum of ten (you can play to other target sums too, like go 11, 12, or even 13!)
